EDUCATION

Carnegie Mellon University

Pittsburgh, PA

B.S. in Computer Science; Additional Major in Mathematical Sciences; GPA: 3.89/4.0

May 2022

- High Honors, Dean's List
- Relevant Coursework: Introduction to Computer Systems, Great Theoretical Ideas in Computer Science, Parallel and Sequential Data Structures and Algorithms, Introduction to Machine Learning, Computer Security

Stanford University

Palo Alto, CA

Graduate Certificate in Artificial Intelligence

Sep. 2025 – Present

- Relevant Coursework: Machine Learning (CS229), Natural Language Processing with Deep Learning (CS224N)

EXPERIENCE

Google

Mountain View, CA

Software Engineer, Google Payments / Google Wallet

June 2022 – Present

GPay Brazil / Pix

Mar. 2024 – Present

- Launched Pix bank balance support for a pilot with X partner banks, enabling users to view balances in Wallet
- Reduced Pix failures by 20% through error handling, fallback logic, and resilience improvements
- Owned metrics, dashboards, and alerts for Pix launches and user journeys, restricting response time to 1 hour

GPay US Features / GPay North America

June 2022 – Mar. 2024

- Launched recurring transaction management in GPay, enabling users to edit and manage recurring charges
- Built age-restriction controls for restricted app features, supporting compliance and product safety
- Added merchant filtering to transaction search, improving GPay transaction discovery

Google

Mountain View, CA

Software Engineering Intern, Google Payments Autofill

June 2021 – Aug. 2021

- Contributed to the Virtual Card Number project, helping replace raw card PANs with secure virtual numbers
- Engineered a backend feature to retrieve and expose risk signals for third-party partners, improving risk evaluation for partner banks

Avodigy / Eventpedia

Remote

Software Engineering Intern, Android / Firebase Development

May 2020 – Aug. 2020

- Developed Android UI and Firebase-backed data models for feed, friend, and notification systems in a social media-style mobile app

NetBrain Technologies

Burlington, MA

Network Automation Intern, API Integration / Automation

May 2019 – Aug. 2019

- Built a proof-of-concept ServiceNow integration web app using JavaScript and validated NetBrain REST APIs

PROJECTS

Wanderform.com | *React, Node.js, Express, Firebase, Firestore, LLM APIs*

June 2025 – Present

- Built Wanderform, an AI travel planner using React, Vite, Tailwind CSS, shadcn/ui, and Firebase
- Engineered Firebase Auth and Firestore workflows for users, profiles, saved trips, and itinerary data
- Integrated Express.js and OpenAI APIs to generate, refine, and summarize structured travel itineraries
- Created calendar, timeline, map, weather, and AI-edit preview tools with Jest and Supertest coverage

Video Game Popularity Prediction | *Python, PyTorch, NumPy, pandas, scikit-learn*

Fall 2025

- Built supervised models to predict Steam game popularity from 27K games using metadata, engagement, reviews, and pricing
- Engineered 513 Steam game features from metadata, reviews, engagement, pricing, and platform signals
- Applied regression, neural networks, k-means, and GMMs to predict popularity and discover game segments

TECHNICAL SKILLS

Languages: Java, Python, C++, Go, JavaScript, TypeScript, C, SQL, SML, HTML/CSS

Frameworks and Tools: React, Node.js, Express, Firebase, Firestore, Android Studio, Git, REST APIs

AI/ML: PyTorch, NumPy, pandas, scikit-learn, LLM APIs

Spoken Languages: Mandarin, French
